Recommendation: Overall view and recommendation
Accept

Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]
The research method is conducted well enough to provide clarity and verifiable process, but a reliability test and supporting references are needed at the last phase of the research,
Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper.
The title doesn't represent the context well enough (too general), there are parts should be simpler like introduction, and how API works on technical details (not necessarily breaking it down into steps). Some figures and could be omitted (Fig.8, Fig. 4, Fig. 1, Table 10, Table 11). Some are not clearly seen or readable, please do consider the bigger image/outline/fonts/lesser blank space (Figure 2, and 6) and please double check the format of the caption and spaces.
