[Lontar Komputer] Editor Decision

2019-06-22 01:08 PM

Eko Budi Setiawan, Hadi Nurdin:

We have reached a decision regarding your submission to Lontar Komputer : Jurnal Ilmiah Teknologi Informasi, " Road Quality Assessment Using International Roughness Index (IRI) Method and Accelerometer on Android".

Our decision is to: Revision Required

Reviewer A:

Please check the attachment

Reviewer B:

- It seems you are using Google Translator as a tool. Check your grammar, check your sentences, split your sentences if it is too long, and check your punctuation.
- If you are using English as language, your figure should too.
- You write down method about getting accelerometer value by using formula, but you said nothing about

Reviewer B:

- It seems you are using Google Translator as a tool. Check your grammar, check your sentences, split your sentences if it is too long, and check your punctuation.
- If you are using English as language, your figure should too.
- You write down method about getting accelerometer value by using formula, but you said nothing about the final calculation result.
- On your introduction, you said a lot about the disadvantage of manually using camera to check road condition, but in your analysis, you are comparing accuracies between motorcycle and car. At least, you should compare between manual checking by using camera and automated by using smartphone. Or you can write down about comparison between motorcycle and car at first place, on your introduction, without bringing up manually using camera.

From Editor:

Review from Editor:

1. Improve grammar, there are still many words that are not appropriate.
2. Adjust the formula format according to the Lontar Komputer template.
3. Add comparative analysis with previous studies related to the IRI method used.
4. Add references from journals related to research made with a minimum number of journals is 15 that published in the last 5 years.

Make revisions like the following List Revisions in Discussion menu and mark revisions that are made in different color so it make Editor easier to check.

Please upload your revision in Revisions menu according to the revisions requested by Reviewers and Editors.
