Abstract
The accounting Information systems (AIS) which is a tool used by management in decision making, so that the AIS function provides an important role in company information management. In research, focus on how to effectively assess AIS risk using risk assessment: risk identification indicators, risk analysis and evaluation, and risk processing. The purpose of this study is used to solve problems with the effectiveness of risk assessment on the quality of accounting information systems and confirm existing theories. The research method using explanatory research method as the object of research in collecting data
