

KORESPONDENSI PROSIDING INTERNASIONAL INCITEST 2020

“UTILIZING TECHNOLOGY OF DYNAMIC FACES ON BUILDINGS”

The screenshot shows the abstract submission interface for the paper titled "Utilizing Technology of Dynamic Faces on Buildings" (Abstract ID: ABS-291). The page is viewed in a browser with the URL incitest.unikom.ac.id/participant/abstract/2020. The author is Dwi Purnomo M Fatah, Dewi Kurniasih, from Universitas Komputer Indonesia. The abstract text discusses the development of dynamic facades in building materials. The submission status is "Abstract Accepted".

[Abstract ID: ABS-291]
Utilizing Technology of Dynamic Faces on Buildings
Topic: Architecture, Urban & Regional Planning, and Civil Engineering
Dwi Purnomo M Fatah, Dewi Kurniasih
Universitas Komputer Indonesia

The development nowadays is getting faster. More and more demand for something that smells of technology that can help humans. So that technology has become the backrest for inventors to create new goods. It's the same as in building materials called material technology. Insistence on the need and awareness of care for the environment, creating material technology that can facilitate humans who use it. One of them is a dynamic facade, which has a futuristic concept that uses sophisticated technology but still refers to the green concept that is concerned about the environment. With the dynamic facade, it is expected to be an educational material for the public to think more visionary and care for the environment. The dynamic facade is also very helpful to humans in terms of saving human labor. Besides everything, the dynamic facade certainly plays an important role in a building. Where the facade is as the face and identity of the building. In addition, the dynamic facade also plays a role in natural lighting and lighting which will help the building to minimize the use of artificial energy which will adversely affect the surrounding environment and the earth. (Approx 193 words)

Keywords: Utilizing technology, dynamic faces, building
