Dear Mr. Irawan Afrianto:

Thank you for uploading your paper 1570753241 (*Prototype Mobile Contactless Transaction System in Traditional Markets to Support the Covid-19 Physical Distancing Program*) to 2021 Bulletin of Electrical Engineering and Informatics. The paper is of type application/pdf and has a length of 634014 bytes.

...

You can modify your paper at <https://edas.info/showPaper.php?m=1570753241> and see all your submissions at <https://edas.info/index.php?c=27818> using the EDAS identifier irawan.afrianto@email.unikom.ac.id

Regards,

- Please strictly use and follow to the template manuscripts (Word Format): <http://iaescor.com/gfa/beei.docx>
- Please upload the revised paper within 8 weeks
- Similarity score of your final manuscript must be less than 25%

Dear Mr. Irawan Afrianto,

After careful review, your paper #1570753241 "Prototype Mobile Contactless Transaction System in Traditional Markets to Support the Covid-19 Physical Distancing Program" for Bulletin of Electrical Engineering and Informatics (BEEI) ISSN: 2089-3191, e-ISSN: 2302-9285, <http://beei.org> requires MAJOR REVISIONS before being accepted for publication in our Scopus indexed journal. Method section is a crucial part of an article. Therefore, it should be presented sufficient clear and complete in every detail facilitating reproducibility by other scientists. For improving your paper, please read our published papers and cite them as appropriate. Search within [https://www.scopus.com/results/results.uri?sort=plf-f&src=s&sid=90160d3b2e0c1bf832c0e527ac637f1f&sof=a&sd=a&sl=104&s=SOURCE-ID+%2821100258382%29+OR+SOURCE-ID+%2821100799500%29+OR+SOURCE-ID+%2821100826382%29+OR+SOURCE-ID+%2821100901206%29&origin=searchadvanced&editSaveSearch=&txGid=ffd3eac18a3e2b02c27d170a4e767865](https://www.scopus.com/results/results.uri?sort=plf-f&src=s&sid=90160d3b2e0c1bf832c0e527ac637f1f&sof=a&sd=a&sl=104&s=SOURCE-ID+%282821100258382%29+OR+SOURCE-ID+%2821100799500%29+OR+SOURCE-ID+%2821100826382%29+OR+SOURCE-ID+%2821100901206%29&origin=searchadvanced&editSaveSearch=&txGid=ffd3eac18a3e2b02c27d170a4e767865) (you must have an access to [scopus.com](https://www.scopus.com)) in the upper left side by typing your keywords to find related papers. For your information, according to international regulations, similarity score of camera-ready paper must be less than 25%. Single author is PROHIBITED. You are asked to submit a revised full manuscript, according to the comment from reviewers. The Editors will check whether the revision already address the reviewers' comments. Failing to do proper revision may lead to the rejection of your paper.

For your information, the Bulletin of Electrical Engineering and Informatics (BEEI), ISSN: 2089-3191, e-ISSN: 2302-9285, <http://beei.org> is open to submission from scholars and experts in the wide areas of electrical, electronics, instrumentation, control, robotics, telecommunication, computer engineering, computer science, information system, information technology and informatics from the global world. This international journal is ACCREDITED (recognised) by the Ministry of Research, Technology and Higher Education, Republic of Indonesia (RISTEKDIKT), Decree No: 60/E/KPT/2016) and indexed by Scopus (Elsevier)/ScimagoJR (SJR), SNIP 2019: 1.358, CiteScore 2019: 1.3, SJR 2019: 0.231; and ACCREDITED (recognised) by the Ministry of Research and Technology/National Agency for Research and Innovation, Republic of Indonesia (Decree No: 60/E/KPT/2016). Beginning with issue 1 of volume 9 (2020), BEEI is published as a bimonthly journal (6 issues/year).

The reviews are below or can be found at <https://edas.info/showPaper.php?m=1570753241>, using your EDAS login name irawan.afrianto@email.unikom.ac.id.

Please upload the revised paper using EDAS on the "Revision" upload button within 8 weeks.

Thank you for your cooperation.

Review 1

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Accept (9)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

It was possible to add more previous and related works and compare them. As well as the limitations of the application of this method must be mentioned. There are some errors in punctuation that can be reviewed.

Recommendation: Your overall rating.

Accept (9)

Revision review 2

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Weak Reject (3)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Borderline Accept (5)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

Paper with the title "Prototype Mobile Contactless Transaction System in Traditional Markets to Support the Covid-19 Physical Distancing Program" has not proposed significant novelty. The proposed system uses Go-Jek app, which is in fact already a SuperApp for cashless e-commerce, which means ideas proposed in the paper are already implemented in the Go-Jek app. We were considering any new/additional features being added, like security or money-back guarantee or possibly returned sales etc., but could not find any. We suggest the authors revise the paper with more useful features and significant improvement to the available e-commerce app in the market.

Recommendation: Your overall rating.

Weak Reject (3)

Revision review 3

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Accept (9)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

The paper is technically and theoretically sound and written good. The proposed solutions are justified by correct simulation studies. The results confirm good operation of the proposed approach. In my opinion the paper contains significant novelty and should be important enough to be published.

1. Please fix the typos in English language, and correct all grammatical and syntax errors.
2. It will be better to include latest papers (i.e, in 2021) work in the area.
3. It will be useful in conclusion section, to mention some of the future directions.

Recommendation: Your overall rating.

Accept (9)

We would like your cooperation with the double check of your revised paper:

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format): <https://iaescore.com/gfa/beei.docx> (or LateX: <https://iaescore.com/gfa/beei.rar>)

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): 1. Introduction - 2. The Proposed Method/Algorithm/Procedure specifically designed (optional) - 3. Research Method - 4. Results and Discussion - 5. Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three parts (within 3-7 paragraphs):

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. Results given in figures should not be repeated in tables. This is where the author(s) should explain in words what he/she/they discovered in the research. It should be clearly laid out and in a logical sequence. This section should be supported suitable references.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article **support** or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Most importantly, please ensure the similarity score is less than 25%. You can refer to EDAS to see the similarity score of your paper. Any paper with a similarity score of more than 25% will be dropped. Please make sure your revised paper follow this rule. If the similarity score of final version is more than 25%, the TPC has the right to cancel the paper to be published at BEEI 2021.

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

(10) We will usually expect a minimum of 25 to 30 references primarily to journal papers, depending on the length of the paper. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that....

...end of the line for my research [16].

6. Tanggal 29 Agustus 2021 mendapatkan notifikasi revisi ke 2 dari reviewer dengan tetap memperhatikan penulisan mengikuti templete dan mengunggah artikel yang sudah direvisi selama 8 minggu dengan skor kemiripan kurang dari 25 %

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

Paper with the title "Prototype Mobile Contactless Transaction System in Traditional Markets to Support the Covid-19 Physical Distancing Program" has not proposed significant novelty. The proposed system uses Go-Jek app, which is in fact already a SuperApp for cashless e-commerce, which means ideas proposed in the paper are already implemented in the Go-Jek app. We were considering any new/additional features being added, like security or money-back guarantee or possibly returned sales etc., but could not find any. We suggest the authors revise the paper with more useful features and significant improvement to the available e-commerce app in the market.

Recommendation: Your overall rating.

Weak Reject (3)

Revision review 3

Novelty and Contribution: Rate the degree of scientific contribution provided by this paper. Do the authors offer new findings? Do they give proper explanation and detailed analysis?

Accept (9)

Paper Presentation: What is your evaluation on the quality of presentation from this paper (e.g. figures, tables, formats, etc.)?

Accept (9)

Detailed Comments: Please provide detailed comments that will be helpful to the TPC for assessing the paper. Also provide feedback to the authors.

The paper is technically and theoretically sound and written good. The proposed solutions are justified by correct simulation studies. The results confirm good operation of the proposed approach. In my opinion the paper contains significant novelty and should be important enough to be published.

1. Please fix the typos in English language, and correct all grammatical and syntax errors.
2. It will be better to include latest papers (i.e, in 2021) work in the area.
3. It will be useful in conclusion section, to mention some of the future directions.

Recommendation: Your overall rating.

Accept (9)

We would like your cooperation with the double check of your revised paper:

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format): <https://iaescore.com/gfa/beej.docx> (or LaTeX: <https://iaescore.com/gfa/beej.rar>)

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): 1. Introduction - 2. The Proposed Method/Algorithm/Procedure specifically designed (optional) - 3. Research Method - 4. Results and Discussion – 5. Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three parts (within 3-7 paragraphs):

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

(4) Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. Results given in figures should not be repeated in tables. This is where the author(s) should explain in words what he/she/they discovered in the research. It should be clearly laid out and in a logical sequence. This section should be supported suitable references.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article support or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Most importantly, please ensure the similarity score is less than 25%. You can refer to EDAS to see the similarity score of your paper. Any paper with a similarity score of more than 25% will be dropped. Please make sure your revised paper follow this rule. If the similarity score of final version is more than 25%, the TPC has the right to cancel the paper to be published at BEEI 2021.

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

(10) We will usually expect a minimum of 25 to 30 references primarily to journal papers, depending on the length of the paper. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

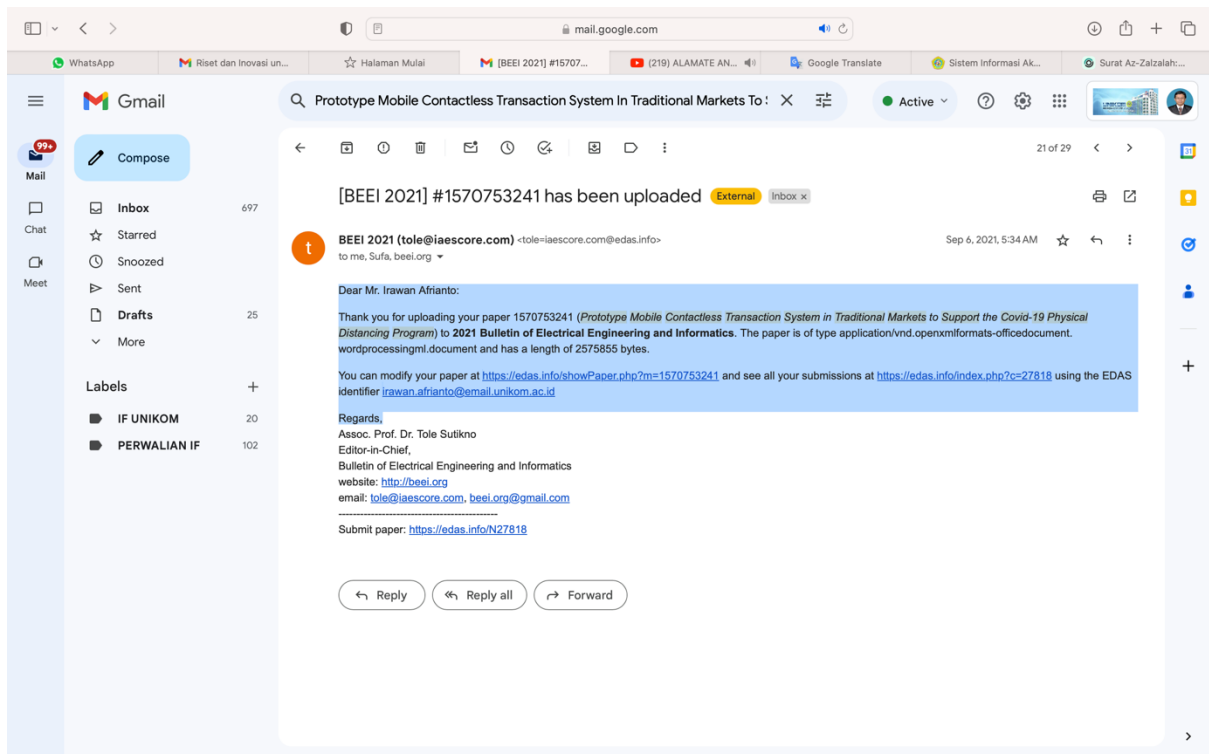

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that...

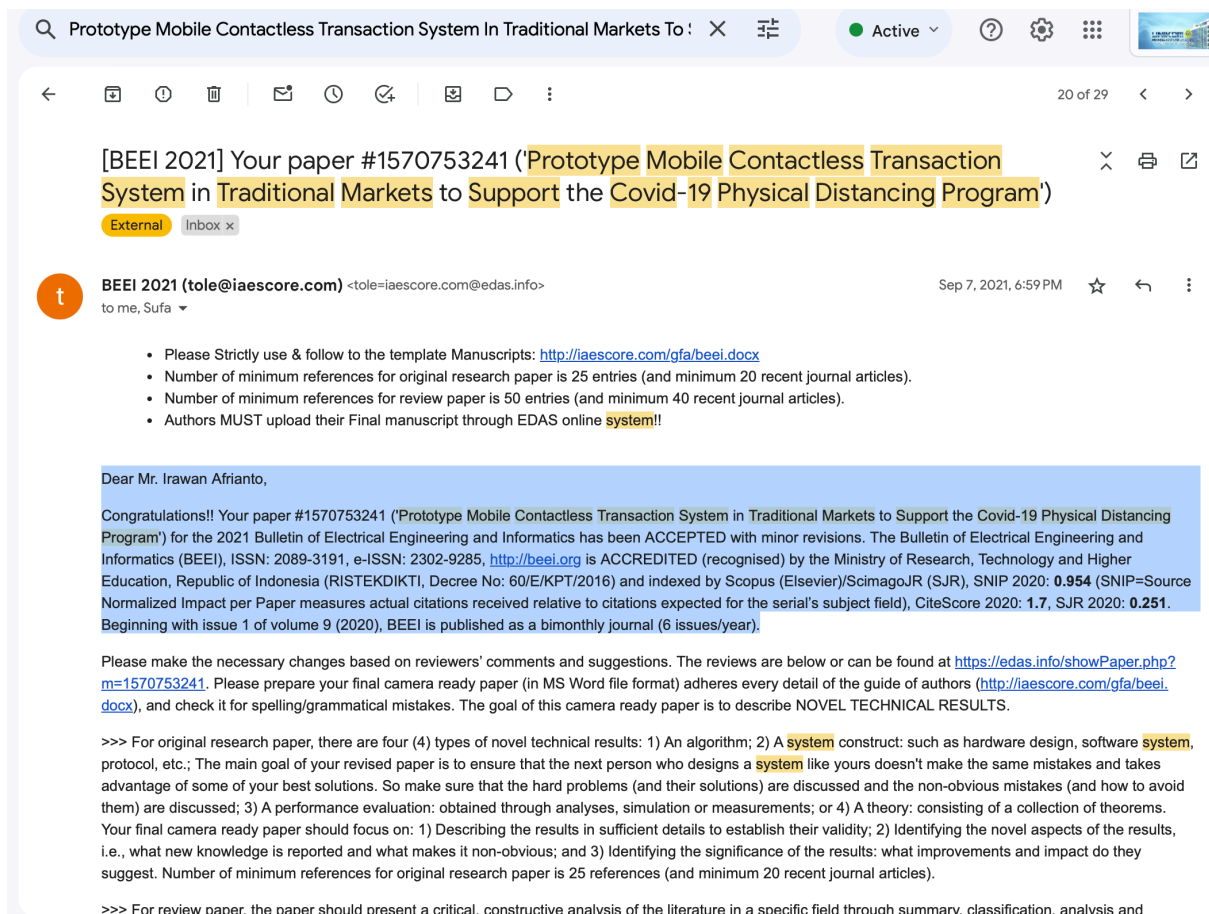

Several recent studies [7], [9], [11-15] have suggested that...

...end of the line for my research [16].

8. Tanggal 6 September 2021 mendapatkan notifikasi telah mengupload perbaikan artikel

9. Tanggal 7 September 2021 mendapatkan notifikasi artikel DITERIMA dengan sedikit revisi

For review paper, the paper should present a clear, concise analysis of the literature in a specific area through summary, classification, analysis and comparison. The function and goal of the review paper is: 1) to organize literature; 2) to evaluate literature; 3) to identify patterns and trends in the literature; 4) to synthesize literature; or 5) to identify research gaps and recommend new research areas. The structure includes: 1. Title – in this case does not indicate that it is a review article. 2. Abstract – includes a description of subjects covered. 3. Introduction includes a description of context (paragraph 1 – 3), motivation for review (paragraph 4, sentence 1) and defines the focus (paragraph 4, sentences 2 – 3) 4. Body – structured by headings and subheadings 5. Conclusion – states the implications of the findings and identifies possible new research fields 6. References ("Literature Review") – organised by number in the order they were cited in the text. Number of minimum references for review paper is 50 references (and minimum 40 recent journal articles).

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25%. Single author is NOT allowed (PROHIBITED). The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

You MUST upload their final manuscript through EDAS online [system](#) for similarity checking by EDAS. You also must submit your final camera ready paper, similarity checking report (by iThenticate or Turnitin software), along with your payment evidence to: tole@iaescore.com within 8 weeks.

I look forward for your response

Sincerely yours,

Assoc. Prof. Dr. Tole Sutikno

(1) TEMPLATE, Please Strictly use and follow to the template Manuscripts (Word Format): <http://iaescore.com/gfa/bee.docx> or <http://iaescore.com/gfa/bee.rar> (LaTeX format). If you use LaTeX, submit your LaTeX source files to tole@iaescore.com

For original research paper:

(2) Authors are suggested to present their articles with IMRaD sections structure (outline): 1. Introduction - 2. The Proposed Method/Algorithm/Procedure specifically designed/In-depth theory/formula (optional) - 3. Research Method - 4. Results and Discussion – 5. Conclusion. Authors may present complex proofs of theorems or non-obvious proofs of correctness of algorithms after introduction section (obvious theorems & straightforward proofs of existing theorems are NOT needed).

(3) Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following 3 elements (**within 3-7 paragraphs**):

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.
- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 15 references (recently journal articles) are cited to support this section.

(4) **Method section: the presentation of the simulation/experimental method should be clear and complete in every detail facilitating reproducibility by other scientists.**

(5) Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This is where the author(s) should explain in words what he/she/they discovered in the research.

(6) (URGENT)!!! About Figures & Tables in your manuscript:

- Because tables and figures supplement the text, all tables and figures should be REFERENCED in the text. Authors MUST EXPLAIN what the reader should look for when using the table or figure. Focus only on the important point the reader should draw from them, and leave the details for the reader to examine on her own.
- Tables are to be presented with single horizontal line under: the table caption, the column headings and at the end of the table. All tables are produced by creating tables in MS Word. Captured tables are NOT allowed.
- All figures MUST in high quality images

(7) Conclusion section: Summarize sentences the primary outcomes of the study in a paragraph. Are the claims in this section supported by the results, do they seem reasonable? Have the authors indicated how the results relate to expectations and to earlier research? Does the article **support** or contradict previous theories? Does the conclusion explain how the research has moved the body of scientific knowledge forward?

(8) Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that...

Several recent studies [7], [9], [11-15] have suggested that....

...end of the line for my research [16].

(9) Please ensure the maximum page of your final paper is 8-page, but still allowed up to 12 pages (required to pay an extra fee).

In order to cover part of the event cost, each accepted paper will be charged: USD 265 (~IDR 3800K). This article publication is to **support** the cost of wide open access dissemination of research results, to manage the various costs associated with handling and editing of the submitted manuscripts, and the Journal management and publication in general, the authors or the author's institution is requested to pay a publication fee for each article accepted. The USD 265 fee covers the standard eight (8) pages manuscript. For every additional page an extra fee of USD 50 (~IDR 715K) per page will be charged.

The payment should be made by bank transfer (T/T):

Dear Prof/Dr/Mr/Mrs: Irawan Afrianto and Sufa Atin,

Congratulations!! Your paper entitled "Prototype Mobile Contactless Transaction System in Traditional Markets to Support the Covid-19 Physical Distancing Program", ID# 1570753241, authors: Irawan Afrianto and Sufa Atin for Bulletin of Electrical Engineering and Informatics has been ACCEPTED and will be published for forthcoming issue. The Bulletin of Electrical Engineering and Informatics (BEEI), ISSN: 2089-3191, e-ISSN: 2302-9285, <http://beeidocx> is open to submission from scholars and experts in the wide areas of electrical, electronics, instrumentation, control, robotics, telecommunication, computer engineering, computer science, information system, information technology and informatics from the global world. This international journal is ACCREDITED (recognised) by the Ministry of Research, Technology and Higher Education, Republic of Indonesia (RISTEKDIKTI, Decree No: 60/E/KPT/2016) and indexed by Scopus (Elsevier/ScimagoJR (SJR), SNIP 2019: 1.358 (SNIP=Source Normalized Impact per Paper measures actual citations received relative to citations expected for the serial's subject field), CiteScore 2019: 1.3, SJR 2019: 0.231; and ACCREDITED (recognised) by the Ministry of Research and Technology/National Agency for Research and Innovation, Republic of Indonesia (Decree No: 60/E/KPT/2016). Beginning with issue 1 of volume 9 (2020), BEEI is published as a bimonthly journal (6 issues/year).

For your information, according to international regulations, similarity score of camera-ready paper should be less than 25% (current similarity score is). Single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already address the reviewers' comments or not. Failing to do proper revision may lead to the rejection of your paper.

Please submit your final camera ready paper and payment receipt to: tole@iaescore.com, cc: beeidocx@gmail.com within 3 weeks.

I look forward for your response

Sincerely yours,
Assoc. Prof. Dr. Tole Sutikno
Editor-in-Chief,
