At this era of 21st century rooted in Information and Communication Technologies (ICTs), a major challenge facing the contemporary diplomatic community globally, is how to adapt to these technologies in their day-to-day activities.

Using of modern technologies in diplomatic activities, be it exchange of information or negotiations, mostly between sovereign states. Thus the application of technologies from telecommunications down to multimedia, transcends mere communication on telephone to Internet chat and exchange of information in matter of seconds.

21st century diplomat should be able to have a good, sound communications and relevant diplomatic reporting abilities, both verbal and written.

before the advent of ICT, every international relations begins with verbal communications, but pointed out that nowadays, it begins online via the Internet, even before the initial meeting of the concerns physically.

## Online negotiation

*by clicking on 'Send' on the Internet via electronic mail (email), means commitment for a diplomat of any State*

*Dr. Kurbalija, who is a former diplomat with professional and academic background in international law, diplomacy and Information Technology (IT), also advised contemporary diplomats **to always ensure they have an IT person on their side with good rapport.***

**So, if you  
were  
Ambassa  
dor, what  
would you  
do ?**

## HOW TO GREET FOREIGN LEADERS
