Reviewer A:

Originality: New or Novel contribution:
Neutral

Significance of Topic: Relating to knowledge contribution, Appropriateness of the research/study method:
Accept

Presentation: Clarity and Organisation of Content, Structure of the paper, Standard of English, Relevance and clarity of drawings, graphs and tables, Appropriateness of abstract as a description of the paper:
Reject

Recommendation: Overall view and recommendation:
Accept

Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]:

Strengths:

- overall, the objective of the paper is presented clearly
- complete and detailed explanation about the software being developed

IJNMT (International

- overall, the objective of the paper is presented clearly
- complete and detailed explanation about the software being developed
- the contribution of the paper is explained clearly

Weaknesses:

- lots of English grammatical mistakes
- too many explanation about Android and its remote access, less focus on the encryption method
- Monitoring? Based on the explanation, the paper explains more about Android device remote access (access to ringtones, camera, lock, erase external, etc. <-- how do these relate to "monitoring" activities? it is still not clear.)
- "If the smartphone has been in a state of death then someone can just change the SIM card or even factory reset. If the SIM Card is replaced it will be a problem because the smartphone can not be monitored either using the internet or via SMS" and "..it is known 18.57% of respondents often use airplane mode .." <= are these problems solved by the paper? it's not clear how the solution works (e.g. phones in airplane mode can't receive SMS too, right?) if not, then the relevance between these facts and your paper is not clear.

Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty,

Contribution/s & Detailed comments: What are the major issues addressed in the paper? Do you consider them important? Comment on the degree of novelty, creativity and technical depth in the paper.:

It is an interesting topic on how to access Android phones remotely using SMS and RSA. The paper shows good technical depth and the overall contribution is conveyed to the reader.

Recommendation: Overall view and recommendation:
Accept

Strengths/Weakness: What are the major reasons to accept/reject the paper? [Be brief.]:

The paper overcomes weaknesses found in related studies. However, the presentation of the paper is a bit lacking. The use of RSA could be more emphasised in the paper as well. Find more respondents for the evaluation.
